Guiding Principles

- Transparency
- Fair play
- Accountability
- Competition
- Efficiency
- Productivity
- Ease of Doing Business
- Reduction in Procurement Cycle Time
- Integrity of the System
- Prevention of Collusion / Corrupt Practices

Computerization Vs. Digital Transformation

Business Process Reengineering

Computerization without Business Process Re-engineering is a farce

Automation

Anything & everything that can be done by the system, shouldn't be done by people. Automation is core requirement of Digital Transformation

Digital Process Flows

Data shall be generated through process flows, not data entry, to the extent possible

Data Duplication

Data already available in the system shall never be reentered

End to End Digitization – Supply Contracts

End to End Digitization – Works Contracts

Project Sanction
